

The Cat's Meow Cat Clinic

Pre-Anesthetic Information

We strive to practice the best medicine possible for your kitty at The Cat's Meow Cat Clinic. There is always some risk associated with any anesthetic procedure and for that reason we **must perform** baseline laboratory tests that may uncover any problems that would otherwise be undetected by a physical exam. This procedure becomes even more important as your kitty ages, since the prevalence of illness is greater in our geriatric patients. This will maximize the safety of your pet and is done in just a few minutes in our "state of the art" in house laboratory.

Pre- Anesthetic lab work Includes (\$89.00):

Chemistry Screen with electrolytes

Tests the Kidney, Liver health and blood glucose levels.

CBC & Differential

Tests blood for signs of infection, anemia and clotting factors

Complete Urinalysis

Tests urine for kidney and bladder functions

These tests are mandatory and are included in the total cost of spay, neuter and declaw procedures.

A Pre- Anesthetic Exam is required before any procedure. During such an exam, problems that may have gone undetected may be uncovered.

Please Choose ONE of the following

- Please have the Doctor decide what is best for my pet. I understand that this may incur additional fees.
- Please have the Doctor or technician call me before any additional procedures are done to my pet. I can be **reliably** reached at the number(s) below.

Additional procedures:

Microchip- we recommend your pet have a microchip implanted for easy permanent identification if lost

Accept- \$35.00 Decline

FELV/ FIV/ HW- If status is unknown or ill, helps to determine immune status in case of disease. HW helps determine if kitty has been exposed to Heartworm, a vascular parasite which can cause respiratory disease and/ or sudden death in apparent healthy cats.

Accept- \$58.00 Decline

Any parasites (fleas, tapeworms) noted on physical exam will be treated before the procedure can be done. This will incur additional fees.

By signing this form I am authorizing the above procedures to be done for my pet.
